

This petition is good because there is a large number of technician class licensees that are stopped at that level not because they don't know the technical and rules part of the test, but because no matter how much they study they can't understand the Morse Code when it is given in a long string. I know that there is a rule where the V.E.'s giving the test could give it letter by letter, however most of the V.E.'s will not do it. I feel that with this petition they could at least become General licensees. I feel this would bring more people into the hobby. Plus it retains the Morse Code portion of the bands for those that like to use it. Please act on this petition as soon as possible.
